## A dispenser for moistening toilet paper.

A feeling of cleanliness as though you were at home – now also in hotels, at the workplace or in restaurants.

Moistened toilet paper is, meanwhile, used in ca. 40 % of all households. With the **XIBU senseMOISTCARE** you can now offer your customers a feeling of being at home also in the washroom which will also help you to stand out from the competition. Simply hold the dry toilet paper under the dispenser and the pre-set amount of **careMOUSSE** will be dispensed touch-free.

The use of mousse is an absolute world innovation. This is, on the one hand, extremely agreeable and, on the other hand, enables economical use of the refill.

Easy to use

for perfect hygiene.

freshly moistened toilet paper

with cleansing careMOUSSE.

The frothy soft **careMOUSSE** for moistening toilet paper has the same ph value as skin and has been **dermatologically tested for allergies and irritations**. Soothing ingredients such as aloe vera ensure a feeling of cleanliness and comfort. One **careMOUSSE** refill in the **vacuumBAG** is sufficient for ca. 500 applications.

The patented **vacuumBAG** ensures **95 % less waste** than with products of other manufacturers. This is also because our refills ensure that **everything is used** whilst other systems waste about 13 % or more. The packaging membra-

ne of the **vacuumBAG** is only a few micrometres thick and **weighs only 21 grams**. A standard waste container can, therefore, hold more than one million **vacuumBAGs**.

# XIBU senseMOISTCARE

*Personal hygiene for the highest standards.*

1. Whilst normal pre-moistened toilet paper often blocks the toilet, is full of germs and creates untidiness in the washroom, the **senseMOISTCARE** dispenses skin friendly **careMOUSSE** which is applied to normal toilet paper. This means that toilet blockages as well as any boxes full of dirty paper are a thing of the past.
2. The use of the mousse guarantees extremely economical dispensing - customers and washroom operators benefit equally.
3. The real revolution is the **careMOUSSE** which foams up in the dispenser. Its ph value which is the same as the skin and the gentle strength of aloe vera cleanse and protect the intimate area. Allergies do not occur thanks to the ingredients used.
4. One **vacuumBAG** with **careMOUSSE** is sufficient for more than 500 applications. Cleaning personnel save time and money. Total toilet paper consumption is also significantly reduced with the use of freshly moistened paper.

## References

*this impresses our customers.*

The idea of moistening normal toilet paper with mousse is, quite simply, genius! The cleaning of our toilets is now also significantly cheaper and takes less time.

*- Martin Gassner, Restaurant Cafe Gassner,  
St.Georgen/Attergau, Austria*

Our customers have liked using moistened toilet paper for already some time. With the new XIBU senseMOISTCARE we now finally have a clean solution which means there are no unnecessary containers standing around in the washroom.

# The XIBU senseMOISTCARE

an intelligent dispenser.

## ① SIMPLE BATTERY CHANGE

The battery can be changed in a matter of seconds - thanks to the easily accessible and removable compartment.

## ② REFILL PROTECTION

The colour coded tank lid guarantees that only the correct refill will be installed in the dispenser.

## ③ „NEVER EMPTY“

A reserve tank ensures that you still have enough for 50 applications even if the **vacuumBAG** is empty.

## ④ FLEXIBLE ASSEMBLY

The dispenser can be opened from both sides. It can, therefore, also be installed in corners or alongside other dispensers. Your refill is protected against theft.

## ⑤ ECONOMICAL USE

You set how much **careMOUSSE** will be used each time.

## ⑥ FUNCTION STANDBY AT A GLANCE

The LED illuminated ring indicates the operational status. Green signals full operational ability, green/red indicates that the refill must be changed.
